

# Carbon-Free Schools

Schools are a key part of a community's infrastructure, but they also consume a lot of energy and emit greenhouse gases. By making our schools carbon-free, we can build more equitable, resilient communities.

## Key Elements

- 1 Retrofit buildings
- 2 HVAC efficiency upgrades
- 3 Install solar panels
- 4 Electrify school transportation

## Benefits

- A Creates thousands of good, union jobs
- B Saves money
- C Improves student & staff health
- D Hands-on learning about the climate
